

项目简介

本项目围绕“轻烹饪·即刻美味”赛题，面向 18-28 岁 Z 世代消费者，提出“**Flavor Pod 风味胶囊 × 智能小程序**”一体化调味生态方案，打造兼具健康化、趣味化与社交化的新型烹饪体验。

方案核心产品为“风味胶囊（Flavor Pod）”，依托太太乐独家酵母提取物鲜味技术，通过单颗定量设计，搭配**一挤即爆的创新结构**，降低烹饪门槛，适配一人食、健身餐、快速备餐等高频场景。同时，我们搭建 AI 智能小程序，用户可输入现有食材、健身目标、口味偏好甚至“今日情绪”，系统即可自动生成菜谱并匹配对应风味胶囊，实现“**输入食材—生成菜谱—生鲜 API 一键购齐**”的完整闭环。

营销上，项目创新提出“风味魔方”概念，用户可像搭积木一样自由组合不同风味胶囊，形成专属调味方案，并通过小程序分享自己的“风味配方”，形成 **UGC 社区与社交传播**。供应链复用雀巢现有产线，无需大额重资产投入，毛利率达 60.4%。

本项目不仅解决了年轻消费者“不会做、懒得做、吃得不健康”的痛点，也**帮助太太乐从传统调味品牌升级为“AI 驱动的数字化烹饪生活方式品牌”**，构建调味品行业中尚未被占领的“硬件+软件+内容”融合生态。

This project revolves around the “Light Cooking · Instant Deliciousness” competition topic, targeting Generation Z consumers aged 18-28. We propose an integrated flavor ecosystem solution — “Flavor Pod × Smart Mini Program” — to create a new cooking experience that is healthy, fun, and social.

The core product of the solution is the “Flavor Pod,” which leverages Totole’s exclusive yeast extract umami technology. Through single-portion, quantitative design and an innovative “squeeze-to-release” structure, the pods lower the barrier to cooking and are suitable for scenarios such as solo meals, fitness meals, and quick meal preparation. At the same time, we have developed an AI-powered mini program where users can input available ingredients, fitness goals, taste preferences, or even “today’s mood,” and the system will automatically generate a recipe and match the appropriate Flavor Pod. This realizes a complete closed-loop process: “input ingredients — generate recipe — one-click API to order all necessary fresh groceries.”

For marketing, the project innovatively introduces the “Flavor Cube” concept. Users can freely combine different Flavor Pods like building blocks to create personalized seasoning solutions, and share their own “flavor formulas” through the mini program, forming a UGC (user-generated content) community and enabling viral social sharing. The supply chain reuses Nestlé’s existing production lines, requiring no heavy capital investment, and achieves a gross profit margin of 60.4%.

This project not only solves young consumers’ pain points of “don’t know how to cook, don’t want to cook, eating unhealthily,” but also helps Totole upgrade from a traditional seasoning brand to an “AI-driven digital cooking lifestyle brand,” building an integrated ecosystem of “hardware + software + content” yet to be established in the seasoning industry.
